- **We believe in having seasoned testing professionals as trainers in our team who have real industry experience**
- **We believe in partnering with Academia & Industry who help us explore and understand the latest innovations in Testing field**

Our Offerings

Pure Trainings offers comprehensive training programs in Testing area.

- ISTQB Certification
- Certification in Software Testing Automation
- Specialized Workshops/Niche Trainings
- Customized Corporate Trainings

ISTQB Certification

- An internationally recognized training program in software testing prepares candidates for ISTQB certification. ISTQB is the largest testing certification in the world with over 70,000 certified testers
- We are an **ISTQB Accredited Training Provider**
- We are the largest training provider in India. We have trained over 5000 testers, test leads and test managers all over the world
- Some of our international clients are in Malaysia, Turkey, Korea, US, Philippines and China

Certification in Software Automation

- In this program candidate is taught principles of testing automation, how to use software testing tools and automate test cases.
- The program helps to apply automation principles and tools knowledge to become more efficient and effective tester.
- The test program enables testers to appear for various automation certifications

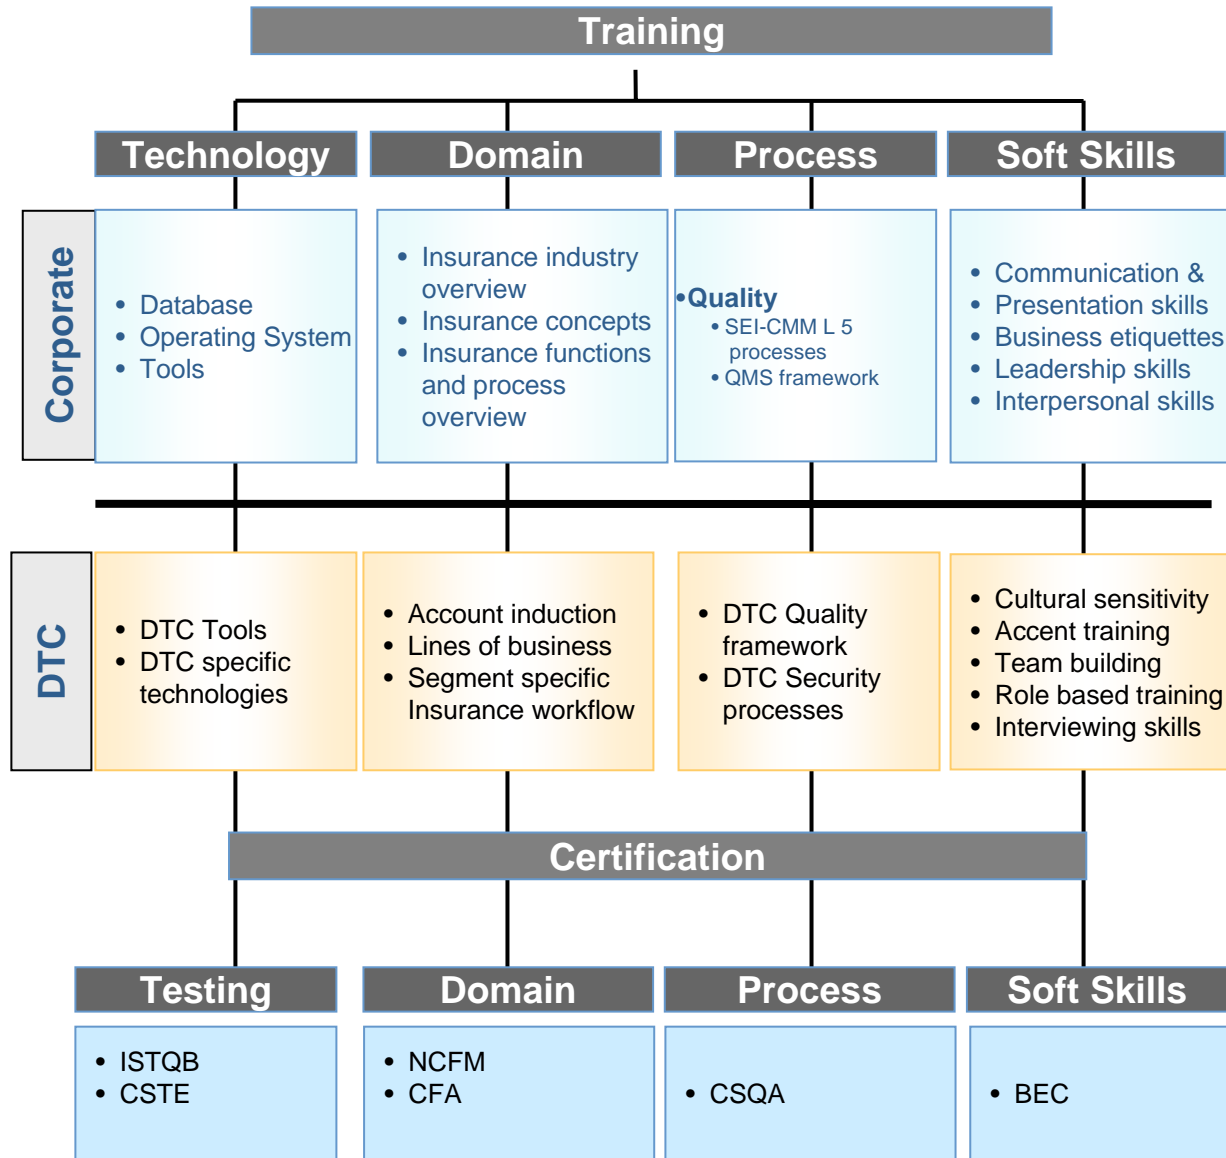

Specialized Workshops

- Special two days workshop conducted at various locations in India & Abroad
- Some of the topics covered -
 - Test Estimation
 - Test Management
 - Risk Based Testing
 - Six-sigma and Lean six-sigma
 - Performance testing
 - Web-based application testing
 - Data-warehouse Testing
 - Accessibility Testing
 - Test Metrics

Customized Corporate Trainings

- We offer customized Corporate Trainings by assessing clients requirements and than tailoring the course content as per their processes creating a blended training course.
- Apart from short term programs (1-5 days) we also offer advanced training programs (15 days - 3 months). These programs are targeted towards testers with no prior experience of testing. These programs help fresh testers turn into professional testers with deep understanding of testing including test estimation, design techniques, test strategy and planning.
